THE “DIGITAL SMILE PATIENT”:

A PROPOSAL FOR AN INNOVATIVE DIDACTICAL AND CLINICAL APPROACH

FEBRUARY 7th 2022

10.00 am - 12.30 pm Dubai time / 7.00 am - 9.30 am CET

We shall show “Digital Dentistry” with keynotes focused on the concept of “3D digital patient”, clinically implemented thanks to innovative diagnostic-operative tools like intra-oral scanners, face scanners, CBCT, augmented reality (AR) visors, etc. The 3D patient can be studied, diagnosed and treated by different teams working at a long distance. At the same time, such a digital approach is also utilized for new, exciting didactical procedures at University “Federico II” of Naples, with great advantages also about academic internationalization: on site, in the presence of teachers/students from Emirates, we shall give demonstration of remote, long distance lessons/seminars, utilizing the most advanced AR tools, connected to the students in Napoli, in a room of “Federico II”, that will participate in the 3D interactive lesson.

Venue **Accademia** - Italy Pavilion

Language English

Important COVID-19 Precautions for Entry: All attendees must show a valid COVID-19 PCR test taken within 72 hours to access the event.

Deadline for registration: **February 5th, 2022**
